Sharan **Ramjee**

Master's Student at Stanford University

(+1) 765-772-6865 | sramjee@stanford.edu | sharanramjee.github.io | sharanramjee | sharanramjee

Education

Stanford University
Stanford, CA

Master of Science in Computer Science (Concentration: Artificial Intelligence) — *Sep. 2020 - Exp. Mar. 2022*

- Distinction in Research; GPA: 4.04/4.00

Purdue University
West Lafayette, IN

Bachelor of Science in Computer Engineering — *Aug. 2016 - May. 2020*

- Graduated with Highest Distinction; GPA: 4.00/4.00

Industry Experience

Stripe
San Francisco, WA

Software Engineering Intern — *Jun. 2021 - Sep. 2021*

- Worked with the Fraud Intelligence team (Merchant Intelligence Engineering Org) on using ML models for detecting fraudulent merchants
- Implemented transformer-based language models for encoding textual features to correlate merchants with fraud scores
- Explored model interpretability methods to explain the decisions made by fraud models in production

Google
Seattle, WA

Software Engineering Intern — *Sep. 2019 - Dec. 2019*

- Worked with the Google Cloud AI team on using Model Distillation to create Explainable AI by generating rules that explain Deep Learning models
- Created a system to tune the complexity of rules generated, number of rules generated, and accuracy of the Deep Learning model
- Implemented Soft Decision Trees, Random Forests, and Gradient Boosted Decision Trees to compare their trade-offs for Model Distillation

Qualcomm
San Diego, CA

Machine Learning Intern — *May. 2019 - Aug. 2019*

- Worked with the ML Application Analysis Team on using Deep Learning to make Qualcomm Snapdragon chips more power-efficient
- Upgraded the automation tool of the QoS logger to run multimedia applications on Android Q and parse log files
- Generated LSTM models using Neural Architecture Search (NAS) to estimate QoS parameters for minimal power consumption

Publicis Groupe
Bengaluru, India

Data Science Intern — *May. 2017 - Jul. 2017*

- Rebuilt the "pandas" library in python and converted it into libraries in Apache Spark, Apache Flink, and TensorFlow
- Created clusters in TensorFlow for generating a distributed network that enabled efficient data processing
- Performed big data analytics using Apache Spark, Hadoop and Microsoft Azure

Research Experience

Google Scholar: [LINK] | Research Interests: Computer Vision, Natural Language Processing, Signal Processing

Stanford Vision and Learning Lab
Stanford, CA

Graduate Researcher — *Sep. 2020 - Jan. 2021*

- Worked on robot learning for intuitive human-robot interaction using Computer Vision at the Stanford Vision and Learning Lab (SVL)
- Researched improvements in human-robot interaction performance obtained using parallelized learning and generated mesh grids for parallel Reinforcement Learning on Gibson using Blender

Massachusetts Institute of Technology
Boston, MA

Research Assistant — *Jul. 2020 - Aug. 2020*

- Worked on bridging the gap between human intelligence and machine intelligence at the MIT Center for Brains, Minds, and Machines (CBMM)
- Researched the synergy between Computer Vision and Physiological Optics with a focus on low-level vision, binocular vision, accommodation, and vision modeling based on how human vision is interpreted by our brains

Purdue University DARPA SC2 Research — *West Lafayette, IN*

Research Assistant — *May. 2018 - May. 2020*

- Researcher at the Purdue DARPA SC2 Research Team (BAM!) in collaboration with Texas A&M
- Qualified for the final round (will take place in Dec 2020) of the DARPA SC2 challenge and won $750,000 in funding from DARPA for finishing in the top 10 teams in the 1st round and $375,000 for finishing in the top 5 teams in the 2nd round

Purdue University Summer Undergraduate Research Fellowship — *West Lafayette, IN*

Research Fellow — *May. 2018 - Aug. 2018*

- Designed Deep Learning models for modulation classification with a focus on online training for network tuning using PCA, LDA, and Autoencoders aided by selective SNR training for Wireless Signal Modulation Classification using Deep Neural Networks with Prof. Aly El Gamal
- Currently hold the record for the highest classification accuracy (99%) with the RML dataset (previous record – 93%)

Publications

Accepted/Published

[$J2$] Xingchen Wang, Shengtai Ju, Xiwen Zhang, **Sharan Ramjee**, Aly El Gamal. "Efficient Training of Deep Classifiers for Wireless Source Identification using Test SNR Estimates". IEEE Wireless Communication Letters **(WCL)**, Apr. 2020 [LINK]

[$J1$] **Sharan Ramjee**, Shengtai Ju, Diyu Yang, Xiaoyu Liu, Aly El Gamal, Yonina C. Eldar. "Fast Deep Learning for Automatic Modulation Classification". IEEE Machine Learning for Communications Emerging Technologies Initiatives **(MLCETI)**, Jan. 2019 [LINK]

Under Review

[$J4$] **Sharan Ramjee**, Aly El Gamal. "Efficient Wrapper Feature Selection using Autoencoder and Model Based Elimination". Submitted to IEEE Letters of the Computer Society **(LOCS)**, May. 2020 [PREPRINT]

[$J3$] **Sharan Ramjee**, Shengtai Ju, Diyu Yang, Xiaoyu Liu, Aly El Gamal, Yonina C. Eldar. "Ensemble Wrapper Subsampling for Deep Modulation Classification". Submitted to IEEE Transactions on Cognitive Communications and Networking **(TCCN)**, May. 2020 [PREPRINT]

Talks

Research Talks

Deep Learning for Interference Identification: Band, Training SNR, and Sample Selection — *Cannes, France*
IEEE Signal Processing Advances in Wireless Communications (SPAWC) 2019 [LINK] — *Jul. 2019*

Deep Neural Network Architectures for Modulation Classification using PCA — *West Lafayette, IN*
The Summer Undergraduate Research Fellowship (SURF) Symposium [LINK] — *Aug. 2018*

A PyTorch Framework for Automatic Modulation Classification — *West Lafayette, IN*
The Summer Undergraduate Research Fellowship (SURF) Symposium [LINK] — *Aug. 2018*

Other Talks

Context-Aware Action Recognition via Spatial and Temporal Transformer Networks — *Stanford, CA*
Stanford University CS 231N: Convolutional Neural Networks for Visual Recognition [LINK] — *Jun. 2021*

Unsupervised Neural Network Models of the Ventral Visual Stream — *Stanford, CA*
Stanford University CS 431: High-level Vision: From Neurons to Deep Neural Networks [LINK] — *Mar. 2021*

Single-Image Stereo Depth Estimation using GANs — *Stanford, CA*
Stanford University CS 231A: Computer Vision, From 3D Reconstruction to Recognition [LINK] — *Mar. 2021*

Super-Resolution of Low-Quality Images for Realtime Pothole Detection — *Stanford, CA*
Stanford University CS 230: Deep Learning [LINK] — *Nov. 2020*

Food Locker — *West Lafayette, IN*
Purdue University Electrical and Computer Engineering Senior Design [LINK] — *May. 2020*

Model Distillation — *Seattle, WA*
Google Cloud AI [LINK] — *Dec. 2019*

QoS Optimization with ML — *San Diego, CA*
Qualcomm Machine Learning Analysis [LINK] — *Aug. 2019*

An Introduction to Deep Learning for Style Transfer — *West Lafayette, IN*
Purdue IEEE Computer Society (CSOCIETY) [LINK] — *Jan. 2018*

Skills

Languages	Python, C, C++, Java, JavaScript, Shell Scripting, MATLAB
Hardware	System Verilog, Embedded C, Assembly, LTspice
Libraries	PyTorch, TensorFlow, Transformers, OpenCV, XGBoost, scikit-learn
Other	Git, LaTeX
OS	Android, Linux, ROS

Teaching Assistantships

Computer Organization & Systems — *Stanford, CA*
CS 107 - Stanford University — *Spring 2021*

Microprocessor Systems and Interfacing — *West Lafayette, IN*
ECE 362 - Purdue University — *Spring 2019*

ASIC Design Laboratory — *West Lafayette, IN*
ECE 337 - Purdue University — *Spring 2019*

Advanced C Programming — *West Lafayette, IN*
ECE 264 - Purdue University — *Spring 2019*

Electronic Measurement Techniques — *West Lafayette, IN*
ECE 207 - Purdue University — *Fall 2018*

Programming Applications For Engineers — *West Lafayette, IN*
CS 159 - Purdue University — *Spring 2018*

Activities

Stanford TreeHacks — *Stanford, CA*

Tech Fellow [LINK] — *Jun. 2021 - Present*

- Working on improving the Stanford TreeHacks Hackathon experience as a part of the TreeHacks tech team
- Working on adding LinkedIn support for easier hackathon application processing and incorporating a project database for showcasing past projects

Purdue IEEE Computer Society (CSociety) — *West Lafayette, IN*

President [LINK] — *Aug. 2017 - Aug. 2019*

- Led several teams in the completion of projects for the Purdue Spark Challenge that is held every semester
- Served as the product manager for the 'Neural Style Transfer using Hardware Convolution' project (Spring 2019) and served as the head of the data analysis team for the 'QUEVIHN: Biomedical Robot' project (Fall 2018) [LINK]

Autonomous Motorsports Purdue (AMP) — *West Lafayette, IN*

Software Team Lead [LINK] — *Nov. 2018 - Aug 2019*

- Led the software team for the development of SLAM algorithms in preparation for the autonomous racing competition held every May [LINK]
- Successfully developed computer vision software using the YOLOv2 for the Velodyne LiDAR [LINK]
- Created onboarding documents to get new recruits up to speed with the Robot Operating System (ROS) framework

Undergraduate Research Society of Purdue (UGRSP) — *West Lafayette, IN*

Founding Ambassador [LINK] — *Oct. 2018 - Aug. 2019*

- Served as the founding ambassador for the College of Engineering to help guide students with research
- Taught students how to present their research, conduct literature reviews, write journal/conference papers
- Engaged in outreach and spreading awareness to recruit a diverse group of students that were passionate about research

Open Source Contributions

TensorFlow — *Remote*

Google Summer of Code Developer — *May. 2020 - Aug. 2020*

- Worked on implementing key research data in TensorFlow Datasets (TFDS)

OpenMRS — *Remote*

Google Code-In Developer — *Dec. 2014 - Feb. 2015*

- Worked on detecting, documenting, and fixing bugs on the Open Medical Record System (OpenMRS) interface

Honors & Awards

Tech Fellowship, Stanford TreeHacks — *Jun. 2021*
Honorable Mention, Stanford AIMI-HIAE COVID-19 Researchathon — *Jun. 2020*
Graduation with Highest Distinction, Purdue University — *May. 2020*
Ideas and Innovation Tournament (I^2TC) Qualifier, Purdue University — *Feb. 2020*
Eta Kappa Nu (Beta Chapter) Outstanding Junior Scholarship, Purdue University — *2019-2020*
Eli Shay Scholarship, (3 times) Purdue University — *2017-2020*
Dean's List, (8 times) Purdue University — *2016-2020*
Wolfram Alpha Award, MadHacks (University of Wisconsin-Madison) — *Nov 2018*
Engineering Design Excellence Award, Purdue University — *Dec. 2016*
12th Board Exam Scholarship, DRDO — *May. 2016*
10th Board Exam Scholarship, DRDO — *May. 2014*

Projects

Cov2GenX | Healthcare ML App — *Stanford, CA*

Stanford AIMI-HIAE COVID-19 Researchathon 2020 [LINK] — *Jun. 2020*

- Cov2GenX is a Machine Learning pipeline for predicting mutation-resistant peptide candidates for COVID-19 vaccines
- Trained Gradient Boosted Decision Trees written in Python using XGBoost to generate a mutation-aware vaccine suite

StrataGem | Fintech Android App — *Madison, WI*

MadHacks 2018 – University of Wisconsin-Madison [LINK] — *Nov. 2018*

- StrataGem is an integrated platform to take care of all your finances - Personal Banking to Investment Advisory
- Written in Java and XML for Android with ML merger prediction and sentiment analysis algorithms written in Python

Vitamin.AI | Health & Fitness Android App — *West Lafayette, IN*

BoilerMake VI – Purdue University [LINK] — *Oct. 2018*

- Vitamin.AI is a Computer Vision driven health & fitness tracking Android App that is an upgrade to FitScan, another android app I made in 2017 [LINK]
- Uses Google Cloud Vision API to classify brand names and AR to detect the size/calories of the products consumed
