Education

Stanford University

MASTER OF SCIENCE IN COMPUTER SCIENCE (CONCENTRATION: ARTIFICIAL INTELLIGENCE)

- GPA: 4.04/4.00

Stanford, CA

Sep. 2020 - Jun. 2022

Purdue University

BACHELOR OF SCIENCE IN COMPUTER ENGINEERING

- Graduated with Highest Distinction; GPA: 4.00/4.00

West Lafayette, IN

Aug. 2016 - May. 2020

Industry Experience

Stripe

SOFTWARE ENGINEER

- Working with the Fraud Detection Team (Accounts Identity and Risk Engineering Org) on developing ML models for merchant fraud detection

San Francisco, CA

Jun. 2022 - Present

Palo Alto Networks

PRODUCT MANAGER

- Worked as a Product Manager at Palo Alto Networks for EE 205: Product Management for Electrical and Computer Scientists
- Delivered a Product Opportunity Assessment (POA) and Minimum Viable Product (MVP) for CAASM (Cyber Asset Attack Surface Mgmt.) products
- Won the award for best Product Opportunity Assessment (POA) as a part of EE 205

Stanford, CA

Sep. 2021 - Nov. 2021

Stripe

SOFTWARE ENGINEERING INTERN

- Worked with the Fraud Intelligence team (Merchant Intelligence Engineering Org) on using ML models for detecting fraudulent merchants
- Deployed model interpretability methods (LIME, SHAP, etc) to investigate false positive and negative predictions made by the models
- Explored various feature encoding methods for numerical, categorical, and boolean features to gauge trade-offs and improve model performance

San Francisco, CA

Jun. 2021 - Sep. 2021

Google

SOFTWARE ENGINEERING INTERN

- Worked with the Google Cloud AI team on using Model Distillation to create Explainable AI by generating rules that explain Deep Learning models
- Created a system to tune the complexity of rules generated, number of rules generated, and accuracy of the Deep Learning model
- Implemented Soft Decision Trees, Random Forests, and Gradient Boosted Decision Trees to compare their trade-offs for Model Distillation

Seattle, WA

Sep. 2019 - Dec. 2019

Qualcomm

MACHINE LEARNING INTERN

- Worked with the ML Application Analysis Team on using Deep Learning to make Qualcomm Snapdragon chips more power-efficient
- Upgraded the automation tool of the QoS logger to run multimedia applications on Android Q and parse log files
- Generated LSTM models using Neural Architecture Search (NAS) to estimate QoS parameters for minimal power consumption

San Diego, CA

May. 2019 - Aug. 2019

Publicis Groupe

DATA SCIENCE INTERN

- Rebuilt the "pandas" library in python and converted it into libraries in Apache Spark, Apache Flink, and TensorFlow
- Created clusters in TensorFlow for generating a distributed network that enabled efficient data processing
- Performed big data analytics using Apache Spark, Hadoop and Microsoft Azure

Bengaluru, India

May. 2017 - Jul. 2017

Research Experience

Google Scholar: [\[LINK\]](#) | Research Interests: Computer Vision, Natural Language Processing, Signal Processing

Stanford Vision and Learning Lab

GRADUATE RESEARCHER

- Worked on robot learning for intuitive human-robot interaction using Computer Vision at the Stanford Vision and Learning Lab (SVL)
- Researched improvements in human-robot interaction performance obtained using parallelized learning and generated mesh grids for parallel Reinforcement Learning on Gibson using Blender

Stanford, CA

Sep. 2020 - Jan. 2021

Massachusetts Institute of Technology

Boston, MA

RESEARCH ASSISTANT

Jul. 2020 - Aug. 2020

- Worked on bridging the gap between human intelligence and machine intelligence at the MIT Center for Brains, Minds, and Machines (CBMM)
- Researched the synergy between Computer Vision and Physiological Optics with a focus on low-level vision, binocular vision, accommodation, and vision modeling based on how human vision is interpreted by our brains

Purdue University DARPA SC2 Research

West Lafayette, IN

RESEARCH ASSISTANT

May. 2018 - May. 2020

- Researcher at the Purdue DARPA SC2 Research Team (BAM!) in collaboration with Texas A&M
- Qualified for the final round (will take place in Dec 2020) of the DARPA SC2 challenge and won \$750,000 in funding from DARPA for finishing in the top 10 teams in the 1st round and \$375,000 for finishing in the top 5 teams in the 2nd round

Purdue University Summer Undergraduate Research Fellowship

West Lafayette, IN

RESEARCH FELLOW

May. 2018 - Aug. 2018

- Designed Deep Learning models for modulation classification with a focus on online training for network tuning using PCA, LDA, and Autoencoders aided by selective SNR training for Wireless Signal Modulation Classification using Deep Neural Networks with Prof. Aly El Gamal
- Currently hold the record for the highest classification accuracy (99%) with the RML dataset (previous record – 93%)

Teaching Assistantships

Artificial Intelligence

CS 221 - STANFORD UNIVERSITY

Stanford, CA

Spring 2022

Web Applications

CS 142 - STANFORD UNIVERSITY

Stanford, CA

Winter 2022

Deep Learning

CS 230 [HEAD TA] - STANFORD UNIVERSITY

Stanford, CA

Fall 2021

Computer Organization & Systems

CS 107 - STANFORD UNIVERSITY

Stanford, CA

Spring 2021

Microprocessor Systems and Interfacing

ECE 362 - PURDUE UNIVERSITY

West Lafayette, IN

Spring 2019

ASIC Design Laboratory

ECE 337 - PURDUE UNIVERSITY

West Lafayette, IN

Spring 2019

Advanced C Programming

ECE 264 - PURDUE UNIVERSITY

West Lafayette, IN

Spring 2019

Electronic Measurement Techniques

ECE 207 - PURDUE UNIVERSITY

West Lafayette, IN

Fall 2018

Programming Applications For Engineers

CS 159 - PURDUE UNIVERSITY

West Lafayette, IN

Spring 2018

Publications

Context-Aware Action Recognition via Spatial and Temporal Transformer Networks

STANFORD UNIVERSITY CS 231N: CONVOLUTIONAL NEURAL NETWORKS FOR VISUAL RECOGNITION [\[LINK\]](#)

Stanford, CA

Jun. 2021

Unsupervised Neural Network Models of the Ventral Visual Stream

STANFORD UNIVERSITY CS 431: HIGH-LEVEL VISION: FROM NEURONS TO DEEP NEURAL NETWORKS [\[LINK\]](#)

Stanford, CA

Mar. 2021

Single-Image Stereo Depth Estimation using GANs

STANFORD UNIVERSITY CS 231A: COMPUTER VISION, FROM 3D RECONSTRUCTION TO RECOGNITION [\[LINK\]](#)

Stanford, CA

Mar. 2021

Super-Resolution of Low-Quality Images for Realtime Pothole Detection

STANFORD UNIVERSITY CS 230: DEEP LEARNING [\[LINK\]](#)

Stanford, CA

Nov. 2020

Model Distillation

GOOGLE CLOUD AI [\[LINK\]](#)

Seattle, WA

Dec. 2019

QoS Optimization with ML

QUALCOMM MACHINE LEARNING ANALYSIS [\[LINK\]](#)

San Diego, CA

Aug. 2019

Activities

Stanford TreeHacks

TECH FELLOW [\[LINK\]](#)

Stanford, CA

Jun. 2021 - Jun. 2022

- Worked on adding documentation to and building the TreeHacks websites using JSDoc and JavaScript
- Worked on improving the Stanford TreeHacks Hackathon experience as a part of the TreeHacks tech team

Purdue IEEE Computer Society (CSociety)

PRESIDENT [\[LINK\]](#)

West Lafayette, IN

Aug. 2017 - Aug. 2019

- Led several teams in the completion of projects for the Purdue Spark Challenge that is held every semester
- Served as the product manager for the 'Neural Style Transfer using Hardware Convolution' project (Spring 2019) and served as the head of the data analysis team for the 'QUEVIHN: Biomedical Robot' project (Fall 2018) [\[LINK\]](#)

Autonomous Motorsports Purdue (AMP)

SOFTWARE TEAM LEAD [\[LINK\]](#)

West Lafayette, IN

Nov. 2018 - Aug. 2019

- Led the software team for the development of SLAM algorithms in preparation for the autonomous racing competition held every May [\[LINK\]](#)
- Successfully developed computer vision software using the YOLOv2 for the Velodyne LiDAR [\[LINK\]](#)
- Created onboarding documents to get new recruits up to speed with the Robot Operating System (ROS) framework

Undergraduate Research Society of Purdue (UGRSP)

FOUNDING AMBASSADOR [\[LINK\]](#)

West Lafayette, IN

Oct. 2018 - Aug. 2019

- Served as the founding ambassador for the College of Engineering to help guide students with research
- Taught students how to present their research, conduct literature reviews, write journal/conference papers
- Engaged in outreach and spreading awareness to recruit a diverse group of students that were passionate about research

Honors & Awards

Best Product Opportunity Assessment (POA) Presentation , Stanford EE 205: Product Management	Nov. 2021
Tech Fellowship , Stanford TreeHacks	Jun. 2021
Honorable Mention , Stanford AIMI-HIAE COVID-19 Researchathon	Jun. 2020
Graduation with Highest Distinction , Purdue University	May. 2020
Ideas and Innovation Tournament (I²TC) Qualifier , Purdue University	Feb. 2020
Eta Kappa Nu (Beta Chapter) Outstanding Junior Scholarship , Purdue University	2019-2020
Eli Shay Scholarship , (3 times) Purdue University	2017-2020
Dean's List , (8 times) Purdue University	2016-2020
Wolfram Alpha Award , MadHacks (University of Wisconsin-Madison)	Nov 2018
Engineering Design Excellence Award , Purdue University	Dec. 2016
12th Board Exam Scholarship , DRDO	May. 2016
10th Board Exam Scholarship , DRDO	May. 2014

Skills

Languages	Python, C, C++, Java, JavaScript, Solidity, Shell Scripting, MATLAB
Hardware	System Verilog, Embedded C, Assembly, LTspice
Libraries	PyTorch, TensorFlow, Transformers, OpenCV, XGBoost, scikit-learn
Other	Git, \LaTeX
OS	Android, Linux, ROS

Open Source Contributions

TensorFlow

GOOGLE SUMMER OF CODE DEVELOPER

- Worked on implementing key research data in TensorFlow Datasets (TFDS)

Remote

May. 2020 - Aug. 2020

OpenMRS

GOOGLE CODE-IN DEVELOPER

- Worked on detecting, documenting, and fixing bugs on the Open Medical Record System (OpenMRS) interface

Remote

Dec. 2014 - Feb. 2015

Certifications

Adventures in Design Thinking: A d.school Experience

STANFORD GRADUATE SUMMER INSTITUTE

Stanford

Sep. 2021

Deep Learning Specialization

Projects

Attention-Weighted Integrated Gradients for Target-Aware Cyberbullying Detection

Stanford, CA

CS 329T: TRUSTWORTHY MACHINE LEARNING [\[LINK\]](#)

Jun. 2022

- The self-attention layer of transformer models are combined with Integrated Gradients for more robust and fair cyberbullying detection

An ML Driven Analysis of Private Equity Funding in Seed-Stage Healthcare Startups

Stanford, CA

GENE 225: HEALTHCARE VENTURE CAPITAL [\[LINK\]](#)

Jun. 2022

- SHAP is applied on an ML model to gain insights on factors driving private equity investment decisions in healthcare startups

AutoChef: Computer Vision for Automated Ingredient-to-Recipe Matching

Stanford, CA

CS 329S: MACHINE LEARNING SYSTEMS DESIGN [\[LINK\]](#)

Mar. 2022

- AutoChef is a web app that uses an object detection model for automated ingredient-to-recipe matching using a single picture of your ingredients

FLITE: Focusing LITE for Memory-Efficient Meta Learning

Stanford, CA

CS 330: DEEP MULTI-TASK AND META LEARNING [\[LINK\]](#)

Dec. 2021

- FLITE is a meta learning wrapper that uses heuristics for gradient estimation during meta training for fast and memory-efficient learning

AdaLA: Adapting Gradient Estimation by Looking Ahead

Stanford, CA

CS 361: ENGINEERING DESIGN OPTIMIZATION [\[LINK\]](#)

Jun. 2021

- AdaLA is an ML optimizer that modifies AdaBelief by using a "look-ahead" strategy to adaptively estimate step sizes to take during gradient descent

Context-Aware Skeleton Action Recognition via Spatial and Temporal Transformer Networks

Stanford, CA

CS 231N: CONVOLUTIONAL NEURAL NETWORKS FOR VISUAL RECOGNITION [\[LINK\]](#)

Jun. 2021

- The Spatial-Temporal Context-aware Transformer Network (ST-CTR) uses graph learning on pose skeletons for improved action recognition

Single-Image Stereo Depth Estimation using GANs

Stanford, CA

CS 231A: COMPUTER VISION, FROM 3D RECONSTRUCTION TO RECOGNITION [\[LINK\]](#)

Mar. 2021

- The single-image stereo depth estimation pipeline uses two GANs in sequence to generate a stereo image counterpart for depth estimation

Histogram Gradient Boosting Trees for Graph Learning with Wasserstein Embeddings

Stanford, CA

CS 224W: MACHINE LEARNING WITH GRAPHS [\[LINK\]](#)

Mar. 2021

- HGBTs are used to predict HIV-inhibiting properties in molecules through graph learning by embedding them in a Wasserstein space

Aspect-Target Sentiment Classification for Cyberbullying Detection

Stanford, CA

CS 224N: NATURAL LANGUAGE PROCESSING WITH DEEP LEARNING [\[LINK\]](#)

Mar. 2021

- Aspect-Target Sentiment Classification uses BERT to perform sentiment classification with respect to a target for cyberbullying detection

Super-Resolution of Low-Quality Dashcam Images for Realtime Pothole Detection

Stanford, CA

CS 230: DEEP LEARNING [\[LINK\]](#)

Nov. 2020

- Super-Resolution GANs are used to address the domain mismatch issue in low-quality dashcams for improved real-time pothole detection

Image Data Augmentation for Plant Leaf Disease Classification Using Neural Style Transfer

Stanford, CA

CS 229: MACHINE LEARNING [\[LINK\]](#)

Nov. 2020

- Neural Style Transfer is used to detect new diseases in new plant species through data augmentation by transferring old diseases to new plants
